

Today's workforce is increasingly mobile. People need to talk, make decisions, and access information while on the go. They want mobile solutions that help make their busy lives more efficient. Give them what they want!

CRM to go!

Introducing:

DynaMitt – a tool for using Microsoft Dynamics CRM data in Symbian S60 mobile computers.

"Know your customers and know them better than your competitors do." Customer Relationship Management (CRM) is part of today's business. Microsoft's Windows-based Dynamics CRM, designed to integrate seamlessly with their Microsoft Office products, is one of the leading CRM solutions on the market. The solution already has over 180,000 users, including companies like Volvo, Pfizer, Perot Systems, United Way, Creative Artists Agency, Boeing and ORKYN.

Fine, but what about when you leave the office?

Make CRM mobile with DynaMitt

Mobile work used to be a challenge for CRM. But not any more! Now, for the first time there's real-time CRM information at the fingertips of the professional on the move. DynaMitt is a tool for using Microsoft Dynamics CRM data in mobile devices running on the Symbian S60 operating system. It allows the user to not only access, but also update the data from anywhere they are at any time they wish. From any Nokia Symbian S60 3.0 mobile device.
